RSCM

1st Indonesian Pediatric Interventional Bronchoscopy Course

Jakarta, 22—23 March 2018

Location: Cipto Mangunkusumo Hospital, Jakarta

Background

The development of bronchoscopy as a support of diagnostic and therapeutic efforts has been very fast in recent years. As a way to visualize the respiratory tract directly, bronchoscopy can be used to diagnose and manage some lung abnormalities. Progress in bronchoscopy field that is currently growing rapidly is a pulmonology intervention. Departement of Pediatrics at Cipto Mangunkusumo Hospital (RSCM) has performed bronchoscopy since June 12th, 2015. Since then there have been 120 bronchoscopic actions in children.
