

INTRODUCTION OF ENDOBRONCHIAL ULTRASOUND AND (CP) EBUS-TBNA JULY 21 - 22, 2017 LIMA - PERU

Venue: Macros Building Auditorium, Av. Manuel
Olguin 501, Surco Lima, Peru

Save The Date!!!

The 1st Peruvian Course on Advanced Bronchoscopy: INTRODUCTION OF ENDOBRONCHIAL ULTRASOUND and (CP) EBUS-TBNA will be held in wintertime of 2017. A two-day program with didactic lectures, interactive sessions, and hands-on training. Presentations will be given by faculty experienced in Interventional Pulmonology. The highlight of the course will be a variety of hands-on sessions using inanimate models and high fidelity simulators.

Endobronchial ultrasound-guided transbronchial needle aspiration is an essential tool for patients with suspected lung cancer. It can provide a diagnosis and accurate nodal stage in one investigation. EBUS-TBNA is recommended for the mediastinal staging of non-small-cell lung cancer .
